Please be fully informed about the dangers and expenses of trading assets on the financial markets (digital or otherwise). ICOs, in particular, is one of the riskiest investing options. There's a chance you'll lose your whole investment.

Investment risks

Trading cryptocurrencies have a high level of risk and is not suited for all investors. You should carefully evaluate your investing goals, level of expertise, and risk appetite before opting to trade cryptocurrencies, tokens, or any other digital asset.

INTRODUCTION

DXBT is a cryptocurrency which is developed in the Bnb smartchain BEP-20 in a reliable manner. This is a smart contract. Our platform is virtual business based network which is operating in Bnb smartchain smart contract. Where we are making the process to fast and easy to use for our clients. We provide the various opportunities to the investors, which is the best and unique way to getting smart amount of return as profit on their investment. Our coin is an emerging investment decision which is very vast by its scope. The DXBT has a benefit of appreciation of its value. It has lower chances of risk. Our priority is to protect the investments of our clients. Our platform is an important part of crowdfunding where some people's are collecting funds and also there are some donators is there. So here we are going to donate a coin as a donation. So it will Raise the value from 1 month to 1 year, once the value increased the Donator will get some increased price and the price value will be doubled. So the donator how much need to donate. And profit amount will be as a one of the investment Part for donator and as well for the company. It is a decentralized system which is very fast and reliable. Furthermore, transactions through DXBT token are very cheap and cost effective. There are the different options for the clients to get the smooth transactions. There are the vast opportunities for the creators and our customers to earn the money online from our decentralized system. This is a payment gateway between two or more parties who transfer their funds in larger number with in the short period of time. DXBT in growing very fast at the Bnb smartchain platform, which is beneficial for the average investors. They will invest lower and make the higher profit because our market growth is increasing.

OUR MISSION

Our goal is to make a faster and unique platform for our customers to make a high standard of living by investing in DXBT, which is getting most appreciative with its value in market. We want to give them a secure platform for investing their funds so they can earn income from online operation. For this purpose we are providing the opportunity of crowdfunding which is very popular and supportive for the customers to get handsome reward of their investment. Our mission is to facilitate our customer through a valid and successful process of their transactions. We are creating different techniques for the investors to protect their amount and give them high and profitable income return. For this purpose we have created Whales technique to checkout their capitals. We are providing Auto-Boost mechanism on our platform so our clients remain aware about all wrong decisions.

OUR VISION

We want to create a digital payment gateway on the blockchain technology, where Bnb smartchain smart contract will support our clients. Our success is holder of the coin is high and buying rate is also high. We want to make full time availability of our services to our clients so they can get more and more benefits from our services. Our vision is to create a crowdfunding platform which will supportive for the sick babies and for poor people. We will provide donation and investment opportunities to our investors they will by our token plan and give donation to the platform and earn money in the form of rewards. Now this amount will be beneficial for the poor people who can meet their basic necessities. Our vision is to make a cheaper, faster and unique payment transfer platform.

ECOSYSTEM

The ecosystem of DXBT is very vast and broader as it provides a payment gateway to the people where they can enjoy vast services and ease of transferring funds. We will create facilities for the investors and potential general public who can invest their amount in various projects at DXB coin. Our ecosystem will support all the community in term of their own benefits. DXBT will launch various plans to invest and donate the funds where every transaction will be easy to use and cheaper.

OUR BUSINESS IDEA

Our platform which is launching DXBT on the Bnb smartchain smart contract, where we will give different opportunities to our customers and investors who will get benefits from our mission. Our business is based on the donation and investment crowdfunding where people will invest their funds and get the profitable rewards than this invested amount will be adjustable to support the children in sick and the people who are poor and can not meet their needs. It is a good investment for future which we can understand from the example that; If a person wants to buy a house for one crore rupees but he don't have one crore in his possession. But, because he has 60 lakhs in my palm, he is going to acquire coins with that money. So, after a month to a year, the coin value doubled, resulting in a profit as well as a precise amount for purchasing a property. people can invest money by purchasing a coin and profiting from it.

TRANSFER OF FUND

DXBT currency is an online payment transfer network that utilises blockchain technology, which is rapidly gaining popularity due to its impressive features. Aku-online Igbo's payment gateway works by having customers choose credit/debit card payment and entering their card details on the payment page. The payment gateway then receives the card information. Our payment gateway will send the information to the payment processor at this time. The quick features of the DXBT allow users to transfer payments in a short amount of time. Furthermore, we offer our customers protection when transmitting money from one location to another. Customer privacy is our first priority, which is why we are developing in-app mobile applications for our consumers to manage their data.

RAPID GROWTH OF ICO

- DXBT is growing rapidly so clients can benefit from its growth. The better the value of
- DXBT in the market the more profit for the early investors. Clients can invest low and make
- huge capital from market growth. They offer high potential profits if you can determine which
- cryptocurrency is a good investment. Since you're buying early, prices are often lower, and
- some ICOs offer tokens at discounted rates. ICOs are accessible to anyone. Unlike some IPOs, there aren't any restrictions on who can invest.
-

CROWDFUNDING

The use of modest sums of funds from a large number of people to finance a new business initiative is known as crowdfunding. Investors either donate money altruistically or receive rewards such as equity in the firm that raised the money, depending on the form of crowdfunding.

INVESTMENT CROWDFUNDING

The corporation does not have to pay back investors if the crowdfunding is done on a donation basis. Many companies, on the other hand, offer early funders perks like as an advance copy of the product.

INVESTMENT CROWDFUNDING

Investment crowdfunding is a method of raising funds for a business by asking a large number of people to invest a little amount of money in it. Backers obtain equity shares in the company in exchange for their contributions. Normally, accredited investors are the only ones who can participate in investment crowdsourcing. The Securities and Exchange Commission (SEC) published final guidelines in 2016 for the Jumpstart Our Business Startups Act (JOBS Act) in the United States, allowing a wider range of investors to invest via crowdsourcing once improved infrastructure was in place. Crowdfunding for investments can include both debt and equity stakes. Micro-loan providers are debt investment companies that allow a large number of people to invest in a small portion of a larger loan. Lenders are usually aware of the loan's purpose and parameters, which include the interest rate, loan length, and the borrower's expected credit rating. Entrepreneurs generally obtain seed funding through borrowing from banks, family, and friends, or by offering equity ownership in exchange for investment from family and friends, as well as angel and venture capital investors. When traditional fundraising avenues are unavailable or too expensive, investment crowdsourcing allows a firm to seek relatively small investments from a large number of backers.

DONATION BASED CROWDFUNDING

Donation crowdfunding is a way to donate money when people are making a gift with no expectation of receiving anything in return. general public is collecting funds. There are some donators who will donate their funds at DXBT platform where their donation can also convert in to rewards. So, here we are going to donate a coin as a donation. where it will Raise the value from 1 month to 1 year, once the value increased the Donator will get some increased price and the price value will be doubled. So, the donator how much need to donate. And profit amount will be as a one of the investment Part for donator and as well for the company. Our platform using the concept of crowdfunding to facilitate the users of DXBT token and the need people who can not meet their needs.

BASIC OBJECTIVE OF CROWDFUNDING

Crowdfunding aims to decouple the financing of entrepreneurs from the harsh world of Private Equity, Venture Capital, and LBO firms. Thus crowdfunding gathers small amounts of funds from a large number of participants to finance a new business venture.

BENEFITS OF INVESTMENT CROWDFUNDING

Both equity and loan investments are available. Crowdfunding might be hazardous, but it allows investors to spread a large quantity of money among a variety of options. It can be an exciting method for people to assist a startup with whom they have a personal connection. Because the buy-in for an equity stake can be extremely minimal (and the firm often sets the conditions), it lowers the barriers to entry for individual investors and can be a good way to learn about startup investing. Due to the credit risk involved with borrowers, lenders often earn a higher interest rate than other debt instruments; but, they can spread a big amount of money progressively across a large number of loans. Borrowers may turn to this type of finance when traditional borrowing is too expensive or unavailable.

Downsides of traditional crowdfunding

Crowdfunding for the most part is a wholly positive venture, however traditional crowdfunding is open to manipulation if not governed correctly. Here are some of the known issues:

Traditional crowdfunding platforms face a higher risk of fraud

This is due to crowdfunding apps having limited security measures. So investors risk their money by supporting startup projects.

Intellectual property isn't protected on crowdfunding platforms

crowdfunding apps do not protect intellectual property at a necessary level this may result in theft of said intellectual property, and can in effect be a business Platform.

Limitations within crowdfunding platforms

since everything on a crowdfunding platform depends on how many people know and support your project. Its easier for projects with good visibility in social media to get funded. At the same time, if there is censorship. Fundraising will not be successful.

Crowdfunding platforms are often loaded with fees -

Fees are one more thing that makes the crowdfunding landscape a little less inviting for young creators. For example, kickstarter. One of the most famous platforms in the crowdfunding industry. Takes about 5% as a standard fee as well as a payment processing fee anywhere between 3% to 5%.

How gocryptome aims to solve the downsides of old fashioned crowdfunding?

Decentralization

Blockchain doesn't need to engage intermediaries or third parties in financial transactions, so it can make crowdfunding much more affordable for creators. Blockchain use also means everything is transparent and recorded. There is no hiding when using blockchain. What's donated is clearly visible.

Tokenization

Tokenization can make the equity type of crowdfunding much better. With tokens. Investors can have an equity share of the project they are financing. It has several benefits for crowdfunding app development, which include. Better visibility for more successful projects, internal currency which can lead to more marketing power, transparency and security.

Smart contracts

Smart contracts are also much faster than usual fund transfers since they don't require intermediaries, provide better protection from fraud. And enable greater security for intellectual property.

CRYPTO REVOLUTIONS

The Cryptocurrency Revolution analyses the transformational prospects of borderless payments, decentralised finance ('DeFi'), and machine-to-machine transactions, as well as the most crucial takeaways from the continuous expansion of digital currencies and blockchain technology. When the world's first decentralised currency, Bitcoin, was launched in 2009, cryptocurrencies were born. Any sort of cash, from fiat money to gold to airline miles, can be traded. They claim to be able to skip typical banking fees and wait times, as well as bitcoin transfers through exchanges. The algorithms that power the cryptocurrency factory are usually developed to reward computers that add transactions to the blockchain with tokens. Mining is the term for this procedure. Miners contribute transactions to blockchains using special hardware and the cryptocurrency's public, decentralised software.

OUR MARKET OFFERINGS

EASY PAYMENT GATEWAY Clients can easily transfer funds across the globe using our application. **RELIABLE GLOBAL PLATFORM** We provide reliable global platform which is safe to use and protects your data. **EASY TO UNDERSTAND** DXBT provides user-friendly applications for mobile and desktop and allows clients to use it easily without second thoughts.

CRYPTO MARKET LEADER

We provide secure payment methods for clients so they can transfer crypto-currencies without any worries. DXBT protects clients from Whales technique which causes investors to lose their capitals. We provide Auto-Boost mechanism which helps our clients to avoid making wrong decisions.

DXBT SOLUTION TO PROBLEM

There are the following solution are useful for various problems.

OPERATION COST REDUCED

Except traditional banking there are many kinds of charges and expenses that are difficult to manage for the corporations. If we focus on the traditional banking then we will get a lot of expenses like administration blocks and headquarters etc, so that's why digital banking has reduced these problem with online platform and applications and different operating software. Blockchain technology is bringing a great revolution in the field of banking. Cost of operation has been reduced.

TIME SAVING TECHNOLOGY

Blockchain banking technology has capability to make the process of banking faster than traditional banking. Because user can make various number of transactions through ATM and mobile banking. It has efficiently working I the online platform of banking.

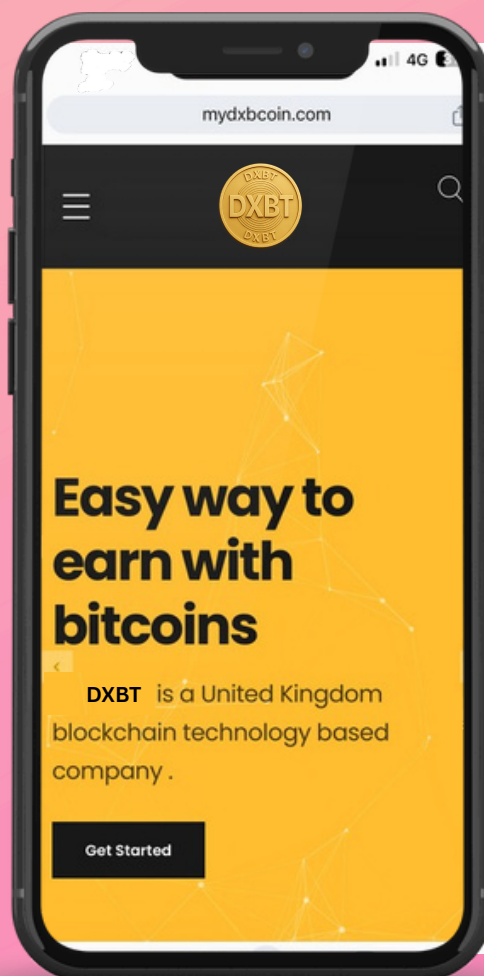

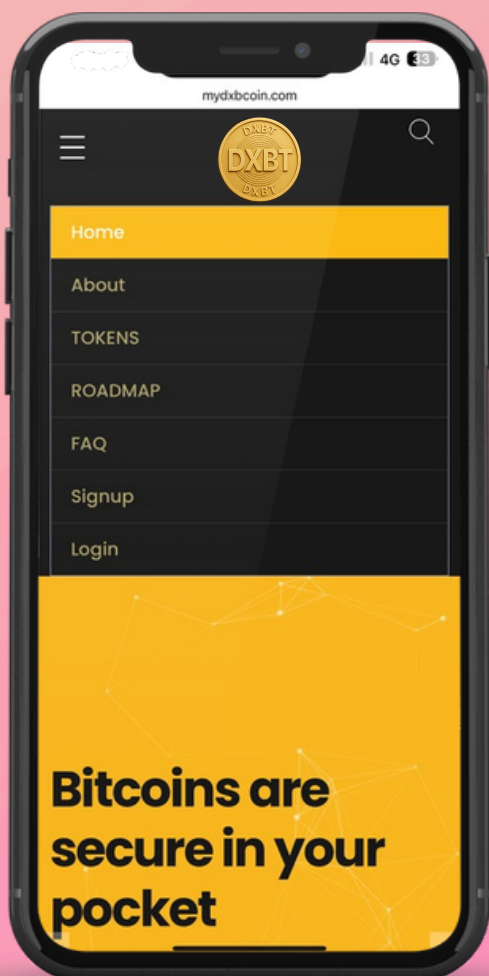

LOWER TRANSACTION FEE

Furthermore, the problem of transactional charges has been solved. Because at online forum of banking consumer has various options and facilities to make his banking transaction successful at proper rates. That's why digital system of banking is providing the lower rates of transaction to users.

DXBT APPS

- Crypto-news curation
- natural language understanding
- wallet aggregation
- professional network
- no more expensive fees

FEATURES OF DXBT

DECENTRALIZED NETWORK

The Decentralised structure of the Crypto Currency allows users to make payment without any interference from third party.

PROTECTION OF USER'S DATA

The Datas of the users are anonymous so the payments made are very secure.

CRYPTO PAYMENT GATEWAY

The Payment gateway uses Blockchain method so the transaction is very safe.

UNLIMITED POSSIBILITIES

Crypto Currency has unlimited possibility of growth and is the future of the Global Currency.

WHY DXBT?

RELIABLE AND DECENTRALIZED DXBT CryptoCurrency is Reliable and Decentralized. We offer protection to your investment and provide global transactions for all our clients. **FULL TRANSPARENCY** All the transactions are transparent, and our clients can check them anytime they want. The Clients investment is managed securely by our organization. **LOWEST PROCESSING FEES DXBT** offers the lowest processing fees to all the clients to transfer funds to another. We provide our clients the option to send and receive funds smoothly. **FASTEST TRANSACTION** Our Clients can transfer currencies smoothly in the fastest way possible. We use the latest tools and technologies to transfer funds reliably.

ROADMAP

- Research Concept development Team
- forming Token launch on social media
- Create website Individual App Launch
- DXBT - investment Crowdfunding
- DXBT - Donation Crowdfunding
-
- We are officially started our airdrop and presales ICO Token 2023

- 2025 will launch our own binary trading platform
- Distribution Smart Contract
- 2027 will launch GAMING PLATFORM
- 2027 will launch NFT MARKETPLACE
-

- DXBT listed on Exchanges Full System
- Hub Mobile Application Launch Hardware advertising & pre orders Website development
-

- Live Platform Launch
- Display Development
- Team Expansion Wallet
- 2028 Will launch our blockchain

- Development Distribution Smart Contract
- Development
- 2029 METAVERSE

TOKENOMICS

TOKEN NAME : DXBT

DXBT TOKEN SYMBOL : DXBT TRADE

TOTAL SUPPLY : 200 Million

BLOCKCHAIN : BINANCE SMART CHAIN

NETWORK : BEP20

CONCLUSION

DXBT is a trustworthy cryptocurrency built on the Bnb smartchain BEP-20 protocol. This is an example of a smart contract. Our platform is a blockchain-based virtual company network that uses Bnb smartchain smart contracts to operate. Where we make the procedure for our clients as quick and simple as possible. We offer investors a variety of options, each of which is the greatest and most unique approach to earn a high rate of return on their investment. Our coin is a new investment option with a wide range of applications. The DXBT currency has the advantage of increasing in value over time. It has a lesser risk of failure. Our top concern is to safeguard our clients' investments.
